

MATERIAL POST

ARCHITECTS DIRECTORY

Starting from the viewpoint that all actors in the construction sector need to establish qualified and constructive communication with each other through **BUILDING CATALOG ARCHITECTS DIRECTORY**, we have expanded our network of participants. By building a bridge between architects and construction companies, we aim to lay the groundwork for potential collaborations among individuals, companies, and brands.

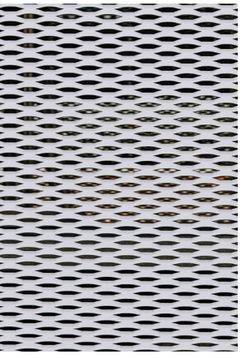

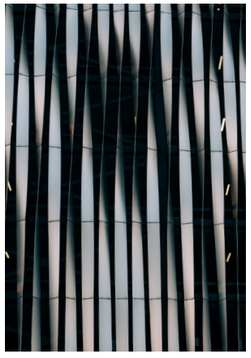

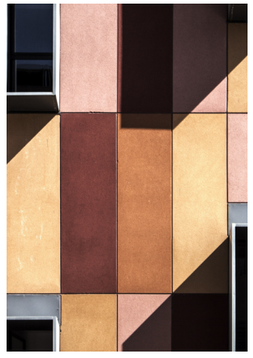

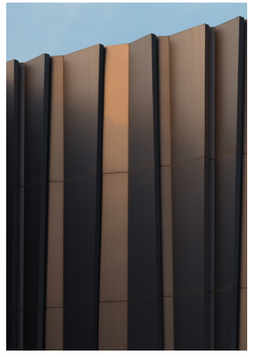

In the **"Architects Directory"** which has had over 250 participants to date, we have included architectural concept designs, implementation projects, product designs, landscape applications, and competition projects; alongside architects, interior designers, and landscape architects. Participants who gained visibility and the opportunity to establish a communication network through the **BUILDING CATALOG**, which is closely followed by professionals in the construction sector with high traffic, have had the chance to come into closer contact with investors and construction companies, promoting themselves and ensuring structured and qualified collaboration. They have also stood out with the monthly bulletins of the **Architects Directory**.

MATERIAL POST

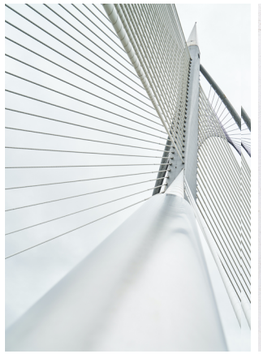

Let us send your material mock-ups, product samples, or catalogs to the material libraries in the architects' offices in the Architects Directory.

Opportunity to directly reach **500** local architecture and interior design firms primarily in Istanbul, Ankara, and Izmir, as well as in other cities.

MATERIAL POST IN NUMBERS

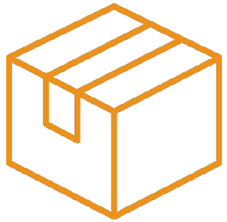

In the boxes, there will be a **maximum of 6** companies not from the same sector and complement each other. The same product cannot be included in two consecutive shipments.

A copy of the samples will be displayed and available for viewing throughout the year at the **YAPI HUB Material Library**.

Materials that can be included in the boxes:

- **20x20x1 cm material mock-up or sample box (up to 350 grams)**
- **Brochure (not exceeding 300 grams)**
- **Technical datasheet (to be created in our format)**
- **'Moodboard' to be created by the Building Catalog Visual Design Team for presentation convenience**
- **Promotional items to the architect.**

MATERIAL
LIBRARY

A copy of the samples will be displayed and available for viewing throughout the year at the **YAPI HUB Material Library**. YAPI HUB the Building Catalog office, is no longer just for employees but aims to bring together the construction, architecture, and building sectors in all contexts. It serves as an important channel and with its established Material Library, plays a crucial role in the sector by housing the product catalogs and samples of significant building material manufacturing companies.

The samples can be examined by member firms, professionals, architects and designers at various workshops, seminars, sector meetings, and other important events. They also become a valuable resource for students and are effectively used within the scope of material and building knowledge courses.

Additionally, through the 'Sample Request' button on the 'Request Quote' forms on your BUILDING CATALOG company and product pages, you can receive sample requests from users.
